OAR AND EMBER

09 / Level Layouts

Tile-level plans for Skarvholm, the steading, Carrick Landing, the occupied island and the Hollow Cairn, with routes, sightlines and landing points.

These plans are the ground truth for the first builds and the late-game return. Each one exists twice: as a drawing for people and as a character grid that an LLM can transcribe directly into tilemap data.

HOW TO USE THIS SET

Coordinates are in tiles unless marked as blocks. The grids at the end of each section are authoritative; the drawings explain them. Distances, speeds and perception ranges come from Book 10. Any change to a grid needs a reachability test re-run and a decision-log entry.

Layout specification. Grids are generated from the same source as the drawings and are internally consistent; they have not yet been playtested.

IN THIS BOOK

01 / Conventions	2	06 / Carrick Landing plan	8
02 / Skarvholm overview	2	07 / Carrick routes, sightlines and timings	9
03 / Skarvholm zones in detail	4	08 / The occupied island	10
04 / The steading plan	5	09 / The Hollow Cairn interior	12
05 / The island grid	7	10 / Layout tests	16

01 / Conventions

One tile is 24 by 24 pixels. x runs east, y runs south, and (0, 0) is the north-west corner.

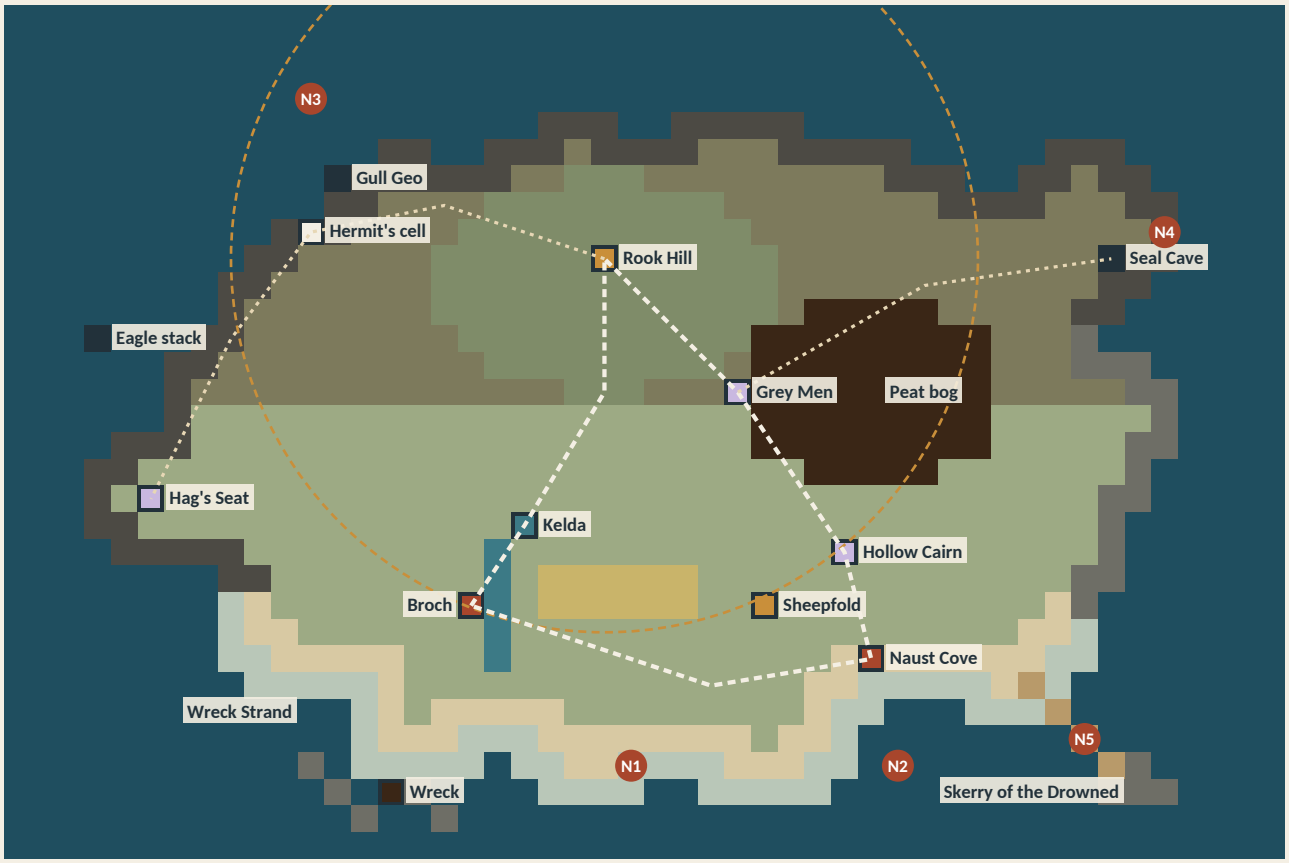

Term	Meaning
Tile	24 x 24 px; about 1.4 m
Block	8 x 8 tiles, used for the island-scale grids
Layers	ground, collision, objects, triggers, spawns, navigation, light
Landing point	A place a boat can beach or moor, with its tide condition
Route	A path with a length in tiles and a time at Book 10 speeds
Sightline	What an observer at a post can see, its range and its dead zones
Dead zone	Ground an observer cannot see because of cliffs, buildings, dunes or scrub

Transcribing a grid

Each character is one tile (or one block in island grids). The legend under each drawing maps characters to terrain. Collision comes from terrain: cliff, rock, walls and deep water block movement; dunes, scrub and woodland allow movement and hide sneaking actors. Buildings are solid except at the doors listed in each section. Height: headlands and hills (^) give observers the Book 10 height bonus, but no observer sees down past a cliff edge unless standing at it.

02 / Skarvholm overview

The whole island at block scale: 48 x 32 blocks, which is 384 x 256 tiles.

~ Deep water
" Heather moor
r Rock or skerry
B Old broch (steading)
S Seal Cave
o The Grey Men (stone ring)
E Eagle stack
- Tidal flats (low tide only)
^ Rook Hill high ground
w Stream
K Kelda Spring
X Hermit's cell
p Sheepfold
. Beach and shingle
b Peat bog
f Field plots
C Hollow Cairn
R Rook Hill summit
G Gull Geo (hidden cove)
, Machair grass
Cliff
= Tidal causeway
H Hag's Seat
N Naust Cove landing
W The wreck

Pale dashed loop: main path. Fine dashes: cliff paths. Ochre ring: sight range of a manned watch cairn on Rook Hill. N1-N5: landing points.

Landing points

Point	Blocks	Condition	Seen from Rook Hill
N1 Wreck Strand	(20 to 24, 27)	Any tide; long carry at low tide	Yes
N2 Naust Cove	(33, 28)	Any tide; the boatshed landing	Yes
N3 Gull Geo	(11 to 12, 3 to 6)	Any tide; narrow; one small boat or a T2 at slack	**No**: hidden under the cliffs
N4 Seal Cave inlet	(43, 8)	High tide, small boats only	**No**: out of range
N5 Skerry of the Drowned	(42, 29)	Causeway to the shore at spring low tides	Yes

Routes

Route	Length	Walk	Run	Notes
Main path loop: broch, Kelda, Rook Hill, Grey Men, cairn, Naust Cove, strand	48 blocks (384 tiles)	110 s	64 s	The daily circuit
Cliff path: Rook Hill, hermit's cell, Hag's Seat	23 blocks (184 tiles)	53 s	31 s	Narrow; falls possible in rain
Grey Men to Seal Cave	15 blocks (122 tiles)	35 s	20 s	Across the bog's northern edge
Naust Cove to the Skerry causeway	5 blocks (40 tiles)	11 s	7 s	Spring low tides only

Sightlines from the watch cairn

A manned cairn on Rook Hill sees 14 blocks from the summit (the ochre ring), which covers the strand, the machair, Naust Cove, the cairn and the Skerry. It cannot see Gull Geo (below the cliffs) or Seal Cave (out of range). A raider who knows the island lands at Gull Geo. Building a second post at the hermit's cell closes that gap; this is a choice the threat schedule rewards.

03 / Skarvholm zones in detail

Each zone is a streamed scene of about 96 x 64 tiles. The zone list and its resources are in Book 4; this section fixes what is where.

Zone	Blocks	Layout notes
ZONE_SK_STRAND	(8 to 30, 22 to 31)	Shingle ribbon with tidal flats below; the wreck on the skerry at (14, 29) reachable on foot at low tide; driftwood spawns along the high-tide line after storms
ZONE_SK_MACHAIR	(12 to 30, 17 to 24)	The steading plan (section 05) sits at blocks (14 to 21, 19 to 23); plots at (20 to 25, 21 to 22)
ZONE_SK_KELDA	(17 to 21, 17 to 21)	Spring pool at (19, 19); stream south to the strand
ZONE_SK_ROOK	(16 to 28, 6 to 14)	Summit at (22, 9); heather slopes; the watch cairn plot
ZONE_SK_BOG	(27 to 37, 11 to 17)	Peat banks give cover to sneaking actors; soft ground slows movement in rain; the old offering lies near (34, 13)
ZONE_SK_GREYMEN	(25 to 29, 12 to 16)	Nine stones round (27, 14); the sunrise alignment points east-north-east
ZONE_SK_CAIRN	(29 to 33, 18 to 23)	Mound at (31, 20) with its sealed east door; sheepfold at (28, 22)
ZONE_SK_CLIFFS	(5 to 40, 3 to 9)	Climbing routes marked with hand-holds; eggs on ledges in spring; eagle stack offshore at (3, 12)
ZONE_SK_GEO	(9 to 14, 2 to 10)	The narrow geo, a steep path up to the hermit's cell at (11, 8)
ZONE_SK_SEALCAVE	(38 to 44, 5 to 12)	Cave mouth at (41, 9); a tidal back passage runs south-west under the bog to the cairn
ZONE_SK_HAGSEAT	(2 to 9, 15 to 21)	The stone at (5, 18); kelp below; the windiest place on the island
ZONE_SK_NAUST	(30 to 43, 23 to 30)	Cove beach, boatshed plot, causeway to the Skerry

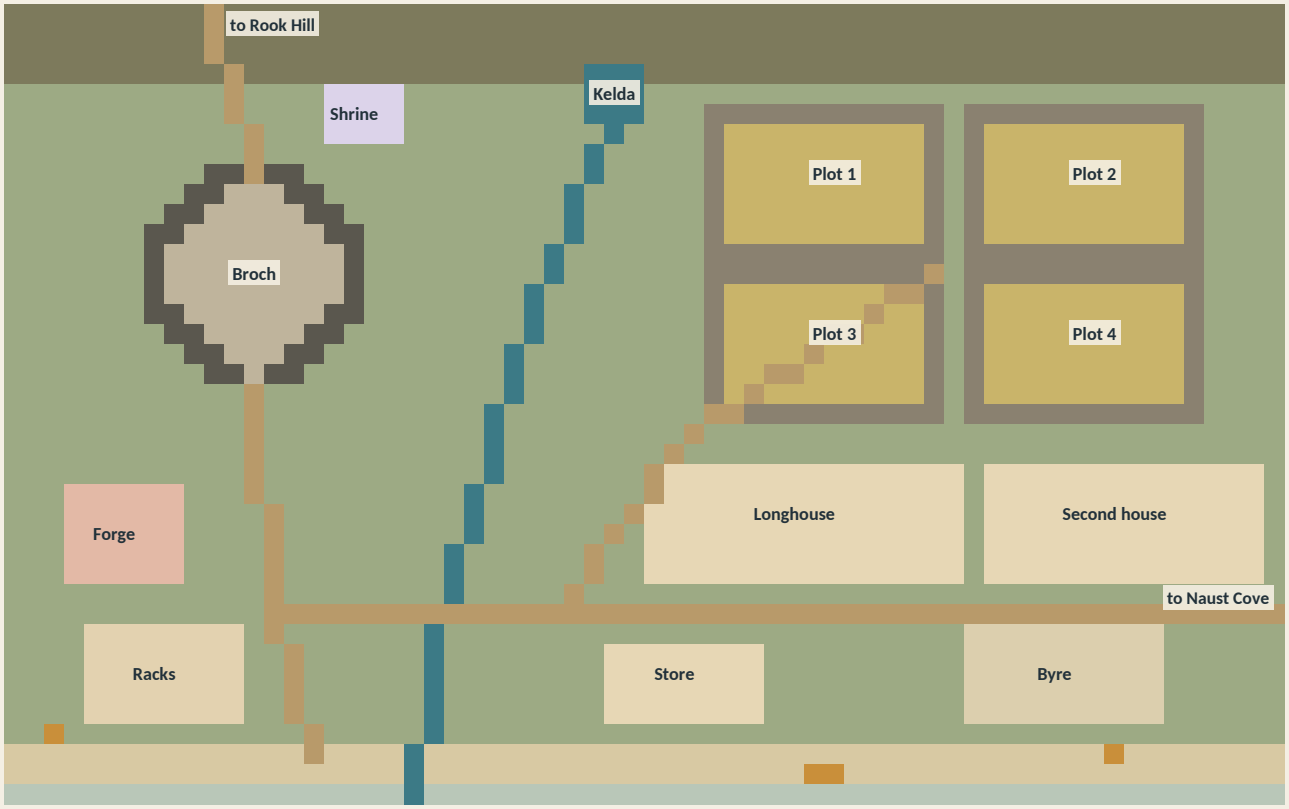

Exploration content

Puzzle or secret	Where	Rule	Reward
Seal Cave tides	ZONE_SK_SEALCAVE	The inner chamber is dry only in the window around low water; the back passage opens only at spring lows	The scavengers' skiff in Chapter 1; later the passage towards the cairn
The Grey Men	ZONE_SK_GREYMEN	At sunrise on a festival morning, the shadow of the tallest stone falls on the cairn's east door	Opens the cairn's sealed east door
The hermit's niche	ZONE_SK_GEO	A loose stone behind the burned altar, found by reading the hermit's carved cross	A psalter page and a clue to Brecc
The bog offering	ZONE_SK_BOG	Peat cut in the right bank in summer exposes a bronze cauldron	Treasure, or an offended keeper if taken
The eggs	ZONE_SK_CLIFFS	Climbing routes; a fall costs vitality, not life	Food in spring

Puzzle or secret	Where	Rule	Reward
The Skerry of the Drowned	ZONE_SK_NAUST	Spring low tides only; the drowned stand there and can be spoken to	News of the dead; Thorkel if he drowned unburied

04 / The steading plan

The household's home ground at tile scale: 64 x 40 tiles around the broch, placed at blocks (14 to 21, 19 to 23).

, Machair
w Kelda Spring and stream
f Barley plot
F Plot: forge
H Plot: shrine
" Heather
0 Broch wall
= Path
S Plot: storehouse
o Boulder
. Shingle
: Broch floor
L Plot: longhouse
Y Plot: byre
- Tide line
+ Field dyke
M Plot: second house
R Plot: racks and smoke-house

Designation plots

Plot	Tiles	Footprint	Notes
Longhouse (L)	(32 to 47, 23 to 28)	16 x 6	East of the stream; doors on the long south side
Second house (M)	(49 to 62, 23 to 28)	14 x 6	
Forge (F)	(3 to 8, 24 to 28)	6 x 5	Downwind and away from thatch
Storehouse (S)	(30 to 37, 32 to 35)	8 x 4	Raised floor; near the path to the shore
Byre (Y)	(48 to 57, 31 to 35)	10 x 5	Near the plots and the grazing
Racks and smoke-house (R)	(4 to 11, 31 to 35)	8 x 5	By the shore for drying wind
Shrine (H)	(16 to 19, 4 to 6)	4 x 3	North of the broch; residents choose its form

These are suggested plots, not fixed sites: the player can designate any building anywhere the placement rules allow. The broch (centre (12, 13), door on the south at (12, 18)) is the first shelter, later a storehouse and the last refuge. Barley plots 1 to 4 sit inside field dykes at the north-east. Paths run from the broch to the shore, east to Naust Cove and north to Rook Hill. The Kelda Spring is at (29 to 31, 3 to 5).

06 / Carrick Landing plan

The first raid site at tile scale: 96 x 64 tiles. Sea to the west, the headland to the north, the track to Ardcarn leaving east.

~ Deep water
" Dunes: hide sneaking actors
t Woodland
= Track or path
K Keeper's house
P Watch post
- Intertidal sand (dry at low tide)
^ Headland high ground
w River
J Jetty
Y Byre
. Dry beach above high tide
Cliff
+ Field wall
b Keeper's currach
R Drying racks
, Grass
s Gorse scrub: cover
f Field
S Storehouse
o Yard fire (night guard)

Red wedges: day sight cones. Ochre disc: night fire light. Dark dashes: stealth route. Ochre line: open approach. Red dots: runner route; fine red: G1 patrol.

Features and doors

Feature	Tiles	Notes
Storehouse	(40 to 47, 24 to 30)	Main door west at (40, 27); loading hatch east at (47, 27), barred from inside
Keeper's house	(50 to 57, 32 to 38)	Door west at (50, 35); Colla sleeps here; the hidden silver under the hearth at (54, 35)
Byre	(50 to 57, 20 to 26)	Door south at (53, 26); the herdsman sleeps in the loft
Drying racks	(34 to 38, 36 to 40)	Cover when crouched
Yard fire	(46, 33)	Night guard's seat; light radius 4
Watch post	(34, 8)	On the headland; manned by day only
Jetty	(8 to 30, 27 to 28)	Reaches water at x 8 at low tide; boats moor at x 22 at high tide

Feature	Tiles	Notes
Keeper's currach	(9 to 10, 29)	Can be towed
Field	(61 to 77, 19 to 33)	Gate at (69, 33)
River	Rows 50 to 55, full width	Boats with shallow draft can enter at high tide to (30, 52)

Landing points

Point	Tiles	Condition	Notes
L1 Jetty	(22, 27) high tide; (8, 27) low tide	Any tide	Closest to the storehouse; in G1's sight
L2 Main beach	(23, 40 to 46) high; (6, 40 to 46) low	Any tide	Open; where Ulf's crew lands (U)
L3 North cove	(14 to 17, 3 to 7)	Any tide	Under the cliffs: hidden from the watch post; gully up at (17, 5)
L4 River mouth	(24, 50 to 55) to (30, 52)	High tide, shallow draft	Out of most sightlines; a long walk to the storehouse

07 / Carrick routes, sightlines and timings

The numbers a raid plan depends on. Speeds and ranges are Book 10's.

Routes

Route	Length	Time	Notes
Storehouse door to the high-tide jetty berth	18 tiles	10 s carrying	Low tide doubles it: 32 tiles, 18 s
Storehouse door to L2 waterline	23 tiles high, 38 low	13 s or 21 s carrying	
Stealth route: L3, gully, headland, scrub, back hatch	42 tiles	24 s sneaking	Outside every day cone; dunes and scrub hide a sneaking party
Open approach: L1 to storehouse door	10 tiles	3 s walking	In the jetty and storehouse cones
Runner: byre to the east edge	50 tiles	8.4 s running	Leaves the map at (95, 35)
Ardcarn horn after the runner leaves		60 s	Visible and audible warning
Fiachra's patrol arrives		120 s after the runner leaves	Enters at (95, 35)

Sightlines by day

Observer	Position	Facing and range	Sees	Dead zones
Watch post (G3)	(34, 8), height	South-west, 110 degrees, 22 tiles	The beach, intertidal and jetty from y 9 to 30	The north cove below the cliff; the scrub and back of the storehouse
Jetty guard (G1)	(30, 30)	West, 110 degrees, 15 tiles	Jetty, intertidal, the sea approach	Dunes to the north; everything east of the storehouse
Storehouse guard (G2)	(39, 26)	West, 110 degrees, 15 tiles	The path, beach front and dune face	The scrub and hatch on the east side

G1 patrols from the jetty root south along the beach to (27, 46) and back every 60 seconds.

At night

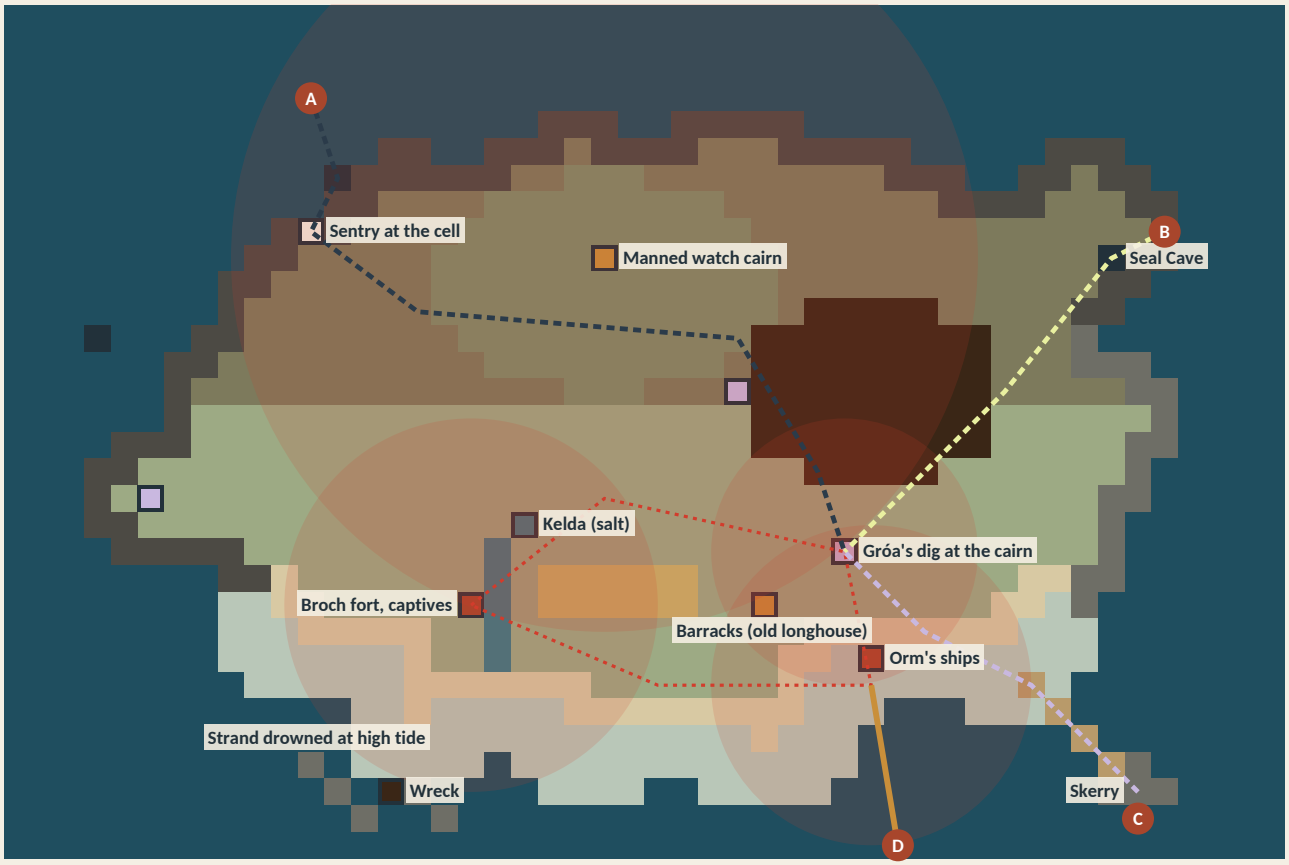

One guard sits at the yard fire (46, 33). Inside its light radius he sees as by day; outside it, 5 tiles. He sleeps at the turn of the tide unless alarmed. G2 and G3 sleep in the keeper's house and wake on a shout or the dogs. The watch post is empty. The back hatch is 6 tiles from the fire: just outside the light and beyond the unlit range, so a sneaking party is unseen there.

After a first raid

Two more guards by day, and two dogs at the keeper's house that hear with three times the normal noise radius and bark (Book 10). The north cove gains a night watcher on the headland edge at (20, 9), who can see down into the cove.

08 / The occupied island

The late game. Long after the household left, Orm's garrison holds Skarvholm, Gróa is digging into the Hollow Cairn, and Rán's tides have drowned the beaches. The household must return for Manannán's Cup (Book 6 scenario 9).

- A Gull Geo at night: cliff path past the cell sentry, through the bog
- B Seal Cave at low water: tidal passage into the cairn
- C Skerry causeway at spring low tide, past the ships
- D Diversion: allied ships strike Orm's boats at Naust Cove

Red discs: garrison sight. Fine red dashes: patrol loop. Beaches have become tidal flats under Rán's tides.

What has changed

- Every beach is now tidal flat, under water at high tide. The wreck still shows at low water.
- The Kelda Spring is salt. The only fresh water left is the spring under the cairn.
- The broch is a fort with a stake palisade, holding any residents left as an outpost as captives.
- The longhouse is a barracks; the boatshed is burned; two of Orm's ships lie at Naust Cove.
- The household's watch cairn on Rook Hill is manned by Orm's men with a horn, using the sightline the household built.
- Sharpened stakes are driven into the drowned strand; a hull landing there at high tide is holed.
- A sentry watches from the hermit's cell at night: Orm's men have learned of Gull Geo, though not of the Seal Cave passage.

Garrison

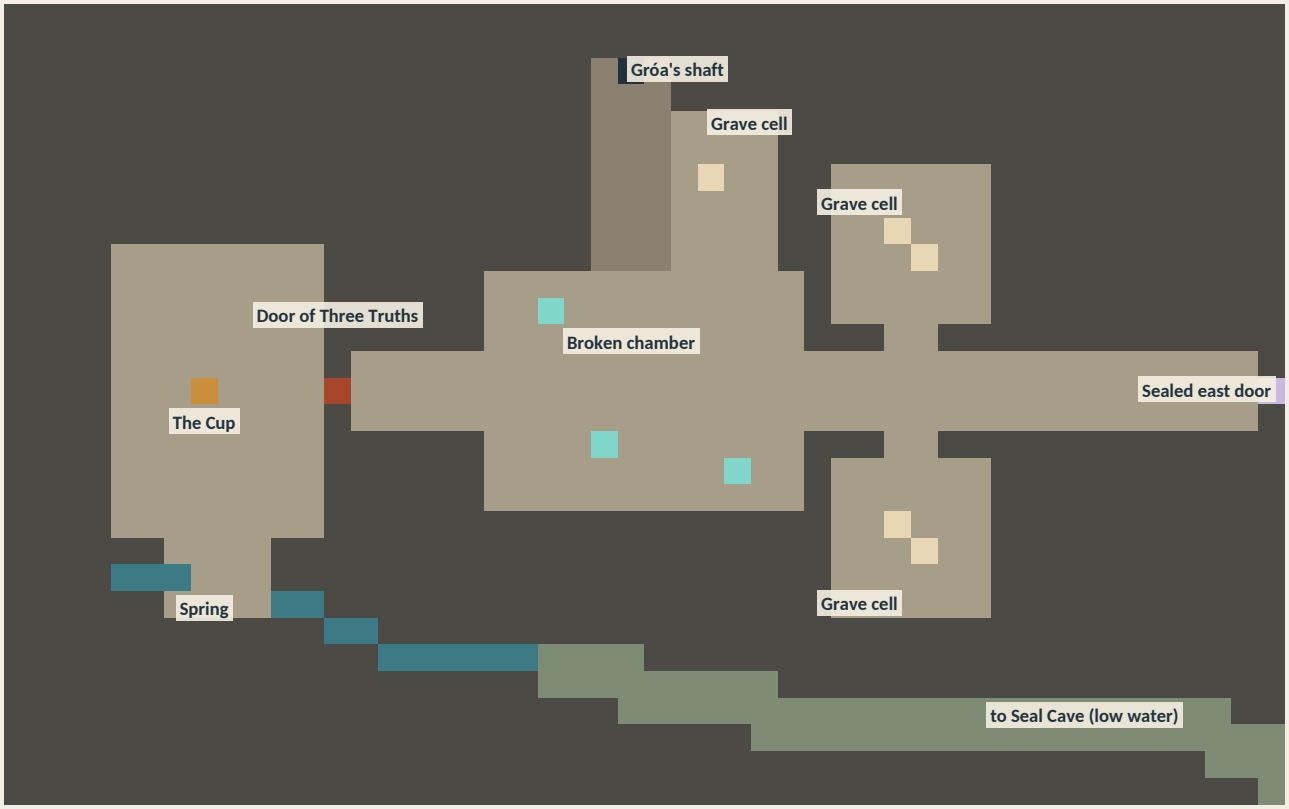

Post	Position (blocks)	Strength	Notes
Broch fort	(17, 22)	Kolgrím and 9 huscarls, 3 dogs	Captives held inside
Barracks	(24, 23)	12 raiders	Asleep at night unless the horn sounds
Watch cairn	(22, 9)	2, a horn and a beacon	Sees 14 blocks; the beacon brings Orm's fleet early (Book 10)
Hermit's cell	(11, 8)	1 sentry at night	Sees down into Gull Geo
Naust Cove ships	(32, 25)	6 on watch	Their crews join a fight in 2 minutes
The dig at the cairn	(31, 20)	Gróa, 4 guards, 6 conscripted diggers	Sea-light at night; the diggers are civilians
Patrol	Broch, Kelda, cairn, Naust, strand	3	One loop every 4 minutes

Approaches

Route	Landing	Window	Strength	Risk
A Gull Geo at night	N3	Night, any tide	Quiet; needs the cell sentry silenced	The cliff path passes within the watch cairn's ring near Rook Hill's west flank; the bog's peat banks give cover
B Seal Cave passage	N4	Spring low tide only	Arrives inside the cairn below Gróa's dig, bypassing the garrison	The passage floods as the tide turns; known only if found in Year 1
C Skerry causeway	N5	Spring low tide	Puts the party beside Orm's ships: burn them to stop pursuit	Close to the Naust watch and the patrol
D Diversion	Allied ships at N2	Any, by day or dusk	Draws the garrison to Naust Cove while a small party goes in	Allies take losses; the horn sounds at once

09 / The Hollow Cairn interior

48 x 30 tiles. The cairn-builders' passages, Gróa's broken-in chamber, the Door of Three Truths and the Cup.

# Rock and cairn stones	. Passage floor	, Rubble of Gróa's shaft	w Spring channel (fresh)
b Grave goods	+ Sea-light (Rán)	g Dig shaft to the surface	E Sealed east door
D Door of Three Truths	C Manannán's Cup	s Tidal passage to Seal Cave	

Layout

Feature	Tiles	Notes
Sealed east door	(47, 14)	Opens from outside only with the Grey Men alignment (Year 1 puzzle), or from inside
Outer passage	(30 to 46, 13 to 15)	Three grave cells off it; taking grave goods is SACRILEGE and wakes their keepers
Broken chamber	(18 to 29, 10 to 18)	Where Gróa's shaft from the surface (23, 2) breaks in; sea-light; her drowned diggers
Door of Three Truths	(12, 14)	Speaks from either side; see Book 6 scenario 9
Inner chamber and the Cup	(4 to 11, 9 to 19); Cup at (7, 14)	The Cup will not leave its stone until the truths are spoken
Spring room	(6 to 9, 20 to 22)	The island's last fresh water, untouched by Rán
Seal Cave passage	From (20, 24) to (47, 28)	Tidal; floods within the Book 10 surge time once the Cup is lifted

```

10 / Layout tests

- Reachability: every landing, objective and exit is reachable under its stated tide condition, for Skarvholm, the steading, Carrick, the occupied island and the cairn.
- Sightline tests: scripted observers at each post see exactly the zones listed, and none of the dead zones.
- Timing tests: carry routes and runner routes match section 07 within 5% at Book 10 speeds.
- Placement tests: every suggested plot passes the Book 2 placement rules.
- The occupied island: approach B is impassable outside spring low tides; approach A is impossible without dealing with the cell sentry or slipping past him in fog.
